

January 19, 2010

Dear Customer,

As of Jan 1, 2010, ECHA, European Chemicals Agency, has published the initial list of SVHC, Substances of Very High Concern, under the REACH Directive. ECHA states the following requirement for suppliers of articles.

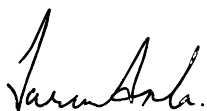

“EU or EEA suppliers of articles which contain substances on the Candidate List in a concentration above 0.1% (w/w) have to provide sufficient information, available to them, to their customers or upon requests, to a consumer within 45 days of the receipt of the request. This information must ensure safe use of the article and as minimum contain the name of the substance.”

None of the listed chemicals in the currently effective SVHC list is used in Isola products or production processes.

More information about REACH and the SVHC list can be found on the ECHA website:
