

Isola Pioneers New Quick-turn Laminate and Prepreg Fabrication Facility

Recognizing the trend of the US Laminate industry shifting demand from large-scale manufacturing to quick-turn prototyping of high quality copper-clad laminates and dielectric prepreg materials, Isola is planning a new and state-of-the-art facility for 2020 that will meet this need head-on. The new quick-turn lamination and prepreg fabrication facility in the Chandler, AZ area will be specifically geared to offering Isola's customers with greatly reduced lead times, even with Isola's most advanced materials. *See our advertorial in the July issue of Microwave Journal.*
