By its very nature, the study's findings suggest the relevance for practitioners of the need to consider both the individual and the social context in which self-reports are collected. The findings of this research suggest that self-reports are not just a measure of the individual's self-perception but also a reflection of the social context in which the self is seen. Practitioners should recall that while using these self-report tools of measuring quality of performance instruments.

Year	1999	2000	2001	2002	2003
1999	100	100	100	100	100

There is a great advantage in having a small, but not too small, group of students participating in the program. It is important to have a group of students who are interested in the program and who are willing to work hard. The group should be small enough to be able to work together and to be able to work on their own. The group should be large enough to be able to work together and to be able to work on their own. The group should be small enough to be able to work together and to be able to work on their own. The group should be large enough to be able to work together and to be able to work on their own.

These results also suggest that the relationship between the marketing and distribution activities and the export success is complex, involving both direct and indirect paths. In addition, the study also suggests that the export success is not only determined by the marketing and distribution activities, but also by the firm's internal resources, such as the firm's financial resources, human resources, and technological resources.
